

REMARKS

In response to the election requirement in the Office Action of March 27, 2006, Applicant hereby elects without traverse the Species A, drawn to a display device comprising a pixel electrode that overlaps with an upper electrode with an insulating film therebetween to provide capacitance. Claims 10, 11, 21, and 22 read on the elected species.

Claims 11 and 22 have been amended and new claims 74-83 have been added, which are believed to read on the elected species. Thus, claims 10, 11, 21, 22, and 74-83 are subject to examination at this time.

The Applicant appreciates Examiner Rude's time in conducting an interview on September 5, 2006. Agreement was reached that claims 10, 11, 21, 22, and 74-83 are subject to examination at this time. Also, in response to the Examiner's indication that claims 38-73 would be withdrawn from consideration and in response to the Examiner's request, the Applicant has changed the status identifiers of claims 38-73 from "Previously Presented" to "Withdrawn."

Examination on the merits is requested.

Respectfully submitted,

  
Eric J. Robinson
